

To,

Mr Sanjeev Saxena,
GM (Opn),
Naresh Kumar & Co Ltd.

SP2 had taken its Major Shut Down (MSD) from 2nd September, 2009 to 10th September 2009. During this shut down, F Blast Furnace was running. Everyday, about 1500 tonnes of sinter return fines was generated which is normally consumed at SP2. But during its shut down period, the total material had to be transported from F BF hopper to RMBB yard by dumpers.

During the whole shut down period, sinter fines was handled by M/s Naresh Kumar and company. The total coordination and supervision was done by Mr Sanjay Kumar Sharma of your company. We are happy to inform you that due to the effort of Mr Sanjay, there was not a single problem during this 9 days of shut down. In between, there was heavy rain for 48 hours. Even then, there was not a single complain from F Blast Furnace. This was truly a commendable feat.

We sincerely appreciate the cooperation provided by M/s Naresh Kumar & Co and look forward to have similar services in future.

Regards,

Debanik Mitra
Sr Manager, SP#2 Operations
